

Further increase in multi-sourcing options, after TAIT Electronics in January 2002, MEDIUM SOFT joined the TETRAPOL Forum

MEDIUM SOFT, the Software developer and System integrator company, especially focused in the Integrated Rescue Systems (IRS), have recently joined the TETRAPOL Forum. This new membership give further evidence of both the market success of the TETRAPOL technology and its open access to manufacturers. MEDIUM SOFT, which provides long-term high-quality services ranging form designing to implementing and putting in operation the information and communications systems, based its membership on a number of factors including :

- ❑ The open availability of the TETRAPOL technology to international manufacturers through the Publicly Available Specifications (PAS). The Integrated Rescue System is constantly updated by adding new modules to improve the effectiveness of emergency communications, and the outstanding feature of MEDIUM SOFT is its ability to use its development skills to react quickly to its customer's ever-changing needs. TETRAPOL will enable MEDIUM SOFT to acquire the underlying expertise of leading edge Professionnal Mobile Radio technology and so to become an early and significant player in the TETRAPOL market.
- ❑ TETRAPOL have already been selected in 28 countries, including 13 in Europe. This matches MEDIUM SOFT's global strategy which markets its products around Europe.
- ❑ The operational advantage of using TETRAPOL have already been well established in the field and many users are enthusiastic about their consequent gains in overall efficiency. MEDIUM SOFT will benefit from TETRAPOL Users Conferences by sharing experience directly with TETRAPOL Users.
- ❑ MEDIUM SOFT will benefit from all TETRAPOL promotion tools : TETRAPOL Web site, TETRAPOL News, TETRAPOL Flash and e-TETRAPOL.

"We are very proud to welcome in the Forum a company which have been awarded in by Romano Prodi, President of the European Commission for its excellence in converting results from information society technologies research to innovative products for the market place for the development of the Integrated Rescue Services, and I am confident that TETRAPOL will enhance the position of MEDIUM SOFT in Europe" declared Hubert Azémard, Chairman of the TETRAPOL Forum.

"Cooperation with TETRAPOL seems to be for us great opportunity to join European market. In the cooperation with TETRAPOL members, thanks to our knowledges and experiences, we are ready to contribute to succesfull solutions of comprehensive information and communication systems in favour of end users, especially in public safety and government sector " declared Jaroslav Machac, director of MEDIUM SOFT company.

Being multi-sourced and a truly open technology, TETRAPOL welcomes one other important player in the Professional Mobile Radio industry into its Forum.

Specialized in Integrated Rescue systems, which is an information and communications system which coordinates public emergency services, MEDIUM SOFT's systems proved to be extraordinarily effective during the floods of 1997, when losses suffered, in terms of people's lives and property, were significantly limited.
