

Successful beginning of year for the TETRAPOL forum, CIM Systems, the UK leader in mission critical communications software joined the TETRAPOL Forum

CIM Systems officially joined the TETRAPOL Forum, giving customers a new independent source for TETRAPOL Technology.

CIM Systems produces mission critical communications software for use in control room environments. Its systems are operational in the most demanding of call handling environments throughout the world. Its customer base includes Police Forces, Fire Brigades, Ambulance Services, Utilities, Public Transportation and Government control rooms.

With their experience of communication integration CIM Systems will offer TETRAPOL Users integrated communications control solutions that suits their requirements.

CIM Systems' decision is anchored in several key factors :

- The availability of an Open standard to other manufacturers through the PAS will enable a company like CIM Systems to quickly acquire the technological expertise behind TETRAPOL and swiftly become a significant player in the TETRAPOL market.
- TETRAPOL has already been selected in 28 countries, including 13 in Europe. This globalization of the TETRAPOL market fits perfectly with the strategy pursued by CIM Systems, which markets its products around the world through partners such as Philips, Siemens, and Damovo.
- The recent successes posted by TETRAPOL - with 3.5 billion Euros of customers commitments - underscore the dynamic outlook for business development for TETRAPOL manufacturers.
- TETRAPOL technology proves its leadership every day in the field, with operational efficiency for users on the 60 networks already in service.

Being multi-sourced and a truly open technology, TETRAPOL welcomes one other important player in the Professional Mobile Radio industry into its Forum.

Formed in 1993, CIM Systems produces mission critical communications software for use in control room environments. Its systems are operational in the most demanding of call handling environments throughout the world. Its customer base includes Police Forces, Fire Brigades, Ambulance Services, Utilities, Public Transportation and Government control rooms.

CIM Systems' software is used by a large number of communications and system integration partners throughout the world including Philips, Siemens, Syntegra and Damovo.
